

# Relay Symbols

Operating device, general symbol	Operating device; Relay coil. Form 1	Relay coil of a slow-releasing relay	Relay coil of a slow-operating relay	Relay coil of a slow-operating and slow-releasing relay
Relay coil of a high speed relay	Relay coil of a relay unaffected by alternating current	Relay coil of an alternating current relay	Relay coil of a mechanically resonant relay	Relay coil of a mechanically latched relay
Relay coil of a polarized relay	Polarized relay, self restoring	Polarized relay with neutral position	Polarized relay, stable positions	Relay coil of a remanent relay. Form 1
Relay coil of a remanent relay. Form 2	Operating device of a thermal relay	Operating device of an electronic relay	No voltage relay	Measuring relay; Device related to a measuring relay
Reverse current relay	Underpower relay	Delayed overcurrent relay	Overcurrent relay	Overpower relay for reactive power
Undervoltage relay	Current relay	Under-impedance relay	Relay detecting short-circuits between windings	Divided-conductor detection relay
Phase-failure detection relay	Locked-rotor detection relay	Overcurrent relay	Buchholz protective device; Gas relay	Device for auto-reclosing; Auto-reclose relay
Static relay, general symbol	Static relay	Static thermal overload relay	Static relay	Ground relay, Earth fault relay
